Description

- SRA** slip resistance on ceramic substrate covered with sodium lauryl sulfate
- SRB** slip resistance on steel substrate covered with glycerol
- SRC** SRA + SRB
- CE** CE mark - meets the requirements of the Parliament Regulation European and Council Council (EU) 2016/425 of 9 March 2016. on PPE and repeal Council Directive 89/686 / EEC

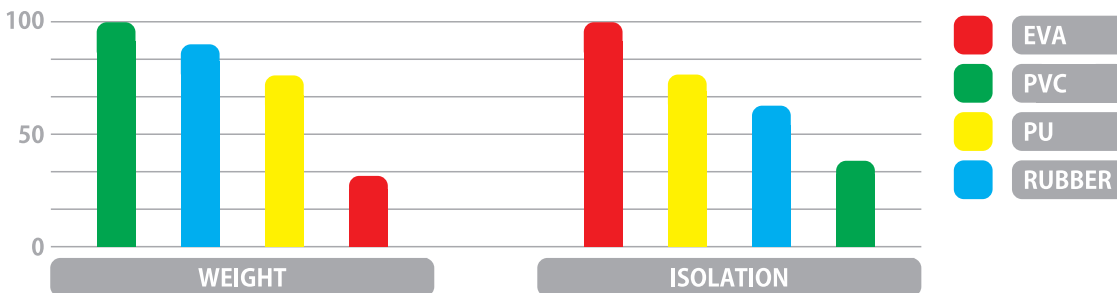

Additional requirements for special applications with appropriate marking symbols

- P** Penetration resistance
- A** Antistatic
- CI** Cold insulation
- E** Energy absorption in the heel
- FO** Diesel resistance

Explanation of the other symbols used in footwear descriptions

- Anti-corrosive toe cap
- Liner
- Super light
- Waterproof
- Certificate CE
- Acid resistant
- Replaceable insert
- Anti slip sole
- Waterproof sole
- Removable liner
- The footwear is allowed for contact with food

Material characteristic

Use of plastics for professional purposes

eva system. Material consisting of polyethylene and vinyl acetate, with the addition of appropriate additives and dyes, becomes a super lightweight material that is perfect for the production of flaps and boots. Used in the medical, pharmaceutical, medical and pharmacy industries and in the food and chemical industries. Ideally suitable hairdressing and beauty salons hotels and catering industry.

EVAPUR system. Patented EVA and PU bonding technology. Used in agriculture, forestry, refrigeration and chemical industry. Footwear is appreciated for its very high insulating and strength properties. Materials used in the product provide increased resistance to mechanical damage and proper microclimate of the foot.

PVC system. PVC Polyvinyl chloride. The product is completely waterproof durable and easy to clean. The footwear made of PVC is dedicated for the food, catering, agricultural, fishing and hunting industry as well as for the chemical and processing industry.

PU system. Polyurethane material most commonly is used for the production of safety and professional footwear. Thanks to its high mechanical resistance, the boots are appreciated, in the mining industry, community work or in sewage treatment plants. The footwear has a wide range in the construction industry as well as in the broadly understood forestry industry. Ideal for the hunting and fishing industry.

Other symbols used in the directory

- Waterproof
- Neopren fabric
- Aluminium used in boots or liners
- Rubber
- Sheep skin
- Felt used in boots or liners
- Reflective piece

No.	874
Material	Shank: EVA Sole: EVA
Colour	white
Weight	0,44 kg
Height	28 cm
Sizes	36 - 42
Packaging	one size/one color/poly bag x6

The footwear has a Certificate / NIZPPZH
No. B-BZ-6071-0142 / 19 / C
Valid until 05/06/2021.

PATENT 001691973

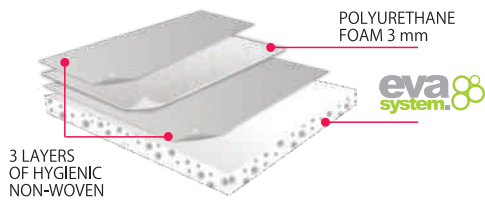

- fully polymer
- made of 100% high quality EVA material
- the pair weighs about 0,44 kg, lighter than shoes made of rubber or PVC
- removable warmer with rim - 100% polyester
- high degree of thermal insulation due to the presence of bubbles air in the material
- waterproof
- provide optimum freedom of movement
- they retain the flexibility even at -30°C
- use throughout the year
- sculptured sole
- shoes compliant with ISO 20344: 2011
- ergonomic shoes conforming to ISO 20344: 2011

Material	Shank: EVA Sole: EVA
Colour	black
Weight	0,56 kg
Height	35 cm
Sizes	36 - 42
Packaging	one size/one color/poly bag x6

- fully polymer footwear
- made of 100% high quality EVA material
- the pair weighs only about 0.56 kg
- much lighter than PVC or rubber footwear
- high degree of thermal insulation due to the presence of air bubbles in the material
- easy to clean and waterproof
- provide optimal freedom of movement, comfortable
- remain flexible even at -30°C
- replaceable liner with a rolled-up felt collar
- for daily use and in rainy weather
